Associate - Business Degree - General Interest Application

[Apply Now](#)

Company: Clinton Health Access Initiative, Inc

Location: Senegal

Category: other-general

Overview

The Associate will lead the collection and analysis of data from a variety of sources such as shipment data via procurers and manufacturers, demographic data from household surveys, and usage data reported by countries. The Associate will be responsible for developing rigorous market analyses such as global market forecasts / outlooks and other reports to support investment decisions by suppliers and supply planning by multilateral agencies and country programs.

The Associate will support global and country team efforts to build, maintain, and update its supply and demand side market strategy for specific commodities and services. For example, this can include developing strategies to secure appropriate production capacity of low-cost, quality-assured contraceptives that meets forecasted demand or supporting the scale-up of new or underutilized contraceptive methods by addressing market barriers. In doing so, the Associate will develop strong relationships with various teams within CHAI, as well as with pharmaceutical suppliers and key opinion leaders.

We are seeking a highly-motivated, entrepreneurial individual with outstanding analytical skills, problem-solving ability and communication skills. The Associate must be able to function independently, be flexible, and have a strong commitment to excellence. CHAI places great value on relevant personal qualities: resourcefulness, responsibility, tenacity,

independence, energy, and work ethic.

Responsibilities

Contribute to the planning and execution of high-impact projects

Provide research and analytical support

Support evaluation and documentation of results and impact from CHAI's work

Develop influential presentation materials that work for varying audiences

Present findings of analyses to a broad range of internal and external audiences in meetings and conferences

Build and manage relationships with key individuals in the Ministry of Health, senior-level stakeholders at procurement agencies, manufacturers, other NGOs, and relevant partner organizations

Identify potential areas of additional support in existing and new focal countries

Design models to assess new opportunities to improve or expand pharmaceutical access programs in the developing world

Develop clear communications materials based upon analyses

Perform other tasks as necessary

Qualifications

Minimum qualifications: Bachelor's degree and 3-5 years analytical experience working in the private sector; Masters strongly preferred

Strong analytical, problem solving, and quantitative modeling skills, plus affinity for analytics and information management

High level of proficiency in Microsoft Office, particularly Excel, PowerPoint and Word (other statistical software package knowledge a plus)

Experience managing large datasets preferred

Excellent written and verbal communication skills, including the ability to prepare compelling presentations

Ability to think strategically, handle ambiguity and work in a fast-paced, limited-structure, multicultural environment

Ability to work independently and effectively in high-pressure, fast-paced environment and handle multiple tasks simultaneously

Ability to learn on the job quickly and absorb/synthesize a broad range of information

Detail-oriented with strong organization skills

Available for at least 25% travel

Ability to be effective in high-pressure situations

Strong interpersonal and written and verbal communication skills, and an ability to build professional relationships with key stakeholders

Ability to react quickly to ad-hoc requests while managing an existing workload

*** Strong professional fluency in English and French will be required for opportunities based in West and Central Africa**
